EDUCATION

Rajiv Gandhi Institute of Petroleum Technology
Bachelor of Technology in Computer Science (CPI: 6.80)*

Amethi, UP
2023 – 2027

Bidhannagar Govt. High School
Class X (Grade: 89%) | Class XII (Grade: 78%)

Kolkata, WB
2011 – 2023

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, OAuth

Databases & DevOps: MongoDB, PostgreSQL, MySQL, Git, GitHub, Docker, CI/CD, GitHub Actions, Linux, Vercel, Render

Core CS & Software Engineering: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design, Microservices, API Design, Testing & Debugging, Agile Development

EXPERIENCE

Full-Stack Developer Intern | [Certificate](#)

May 2026 – July 2026

CeDISI Partners LLP

Remote

- Architected and shipped the **DigitalMSME AI** platform on **React.js, Node.js, Express.js, and PostgreSQL**, integrating **20+ REST APIs** across financial, business, identity-verification, and government services for **100+ MSME users** in production.
- Delivered a client-facing CMS for digitalmsme.com with secure authentication, **role-based access control**, reusable React components, and modular architecture, cutting content turnaround time by **40%**.
- Embedded the **OpenAI API** into an AI financial advisory assistant with prompt engineering, session management, and multi-turn context retention; contributed via code reviews, debugging, and testing under **software engineering best practices**.

PROJECTS

DigitalMSME AI

- Engineered a **scalable full-stack application** using modular React components, reusable service layers, and JWT-protected routes, unifying AI assistance, identity verification, wallet management, and subscriptions.
- Structured an AI-driven advisory workflow with persistent conversation history and contextual follow-ups mapped to real MSME operations.
- Hardened the backend with centralized **error handling**, fallback mechanisms, and **Docker**-based deployment, sustaining **500+ concurrent API requests**.

Chat Application – QuickChat

- Implemented a real-time messaging platform on the **MERN** stack with **JWT authentication**, bcrypt password hashing, and stateless session handling across **20+ concurrent users**.
- Streamed bidirectional messages through **Socket.io** at **sub-100ms latency** behind a responsive React.js and Tailwind CSS interface deployed on Vercel.
- Designed and validated **12+ REST API** endpoints in Express.js and MongoDB with middleware-based authorization, schema-level validation, and protected routes.

Credit Card Fraud Detection

- Trained a Python fraud-detection classifier on **284,807 transactions**, reaching **99.82% accuracy** through hyperparameter tuning and SMOTE-based class balancing.
- Analyzed fraud patterns across 30 PCA-transformed features with Pandas, NumPy, and Matplotlib, benchmarking precision, recall, and F1 to validate model reliability.

ACHIEVEMENTS / CERTIFICATIONS

- **JEE Advanced 2023 Qualified:** Top 2.5% of 1.2M+ JEE Main qualifiers, one of India's most competitive exams.
- **AI/ML for Geodata Analysis (ISRO):** Completed training in Deep Learning, CNN, and satellite image processing. [View](#)
- **Cybersecurity Analyst Job Simulation (TATA):** Practiced threat analysis, phishing identification, and incident response.
- **Competitive Programming:** Solved 200+ DSA problems on LeetCode and CodeChef (C++). [View](#)

POSITIONS OF RESPONSIBILITY

Public Relations Executive, GDSC RGIPT

2024 – Present

- Spearheaded outreach for **50+ students**, coordinating technical events, hackathons, and guest talks on Web Development and AI; grew participation by **30%** through speaker outreach and cross-team collaboration.
